t: 0402 499 459

w: github.com/vincivee

Web Developer with prior experience as a Quality Engineer and a degree in Mechatronics engineering. Recently completed a Diploma of IT to transition into web development, applying structured problem-solving, testing discipline, and programming skills to build robust web applications.

Projects

Grace Grocery (gracegrocery.com.au)

Dec 2025

WordPress / Elementor / WooCommerce

- Led a small development team to deliver a grocery website for a real client.
- Managed client and team meetings, gathered requirements, and tracked project milestones.
- Designed wireframes and style guides in Figma, ensuring consistent UI/UX.
- Created project documentation and handover materials for the client.
- Conducted cross-device testing, applied SEO best practices, and improved performance using Google Lighthouse.

Released Artworks (releasedartworks.vercel.app)

June 2025

Next.js / Vite / MongoDB / Sass

- Built a full-stack artwork aggregator using Next.js.
- Integrated the MET Museum API for dynamic artwork data retrieval.
- Designed server-side data retrieval and storage workflow, caching data in MongoDB.

Oyez Oyez

Dec 2025

Firestore / Express / React / Node.js / TanStack Query / Vanilla Extract

- Full-stack e-commerce application.

Bob's Garage

Dec 2025

React / Node.js / Express / MySQL / Redux / Vanilla Extract

- Full-stack auto-repair website with a built-in content management system.

Application Management System

May 2025

.NET Core / SQL / Bootstrap / MVC architecture / Azure

Education

Diploma of IT – Back-End Web Development

2025

Holmesglen Institute – Chadstone Campus

- Key areas: Full-stack web development, RESTful APIs, authentication and authorisation, responsive design, Agile methodology, software development life cycle (SDLC), database design, MVC architecture.

BEng (Honours) - Robotics and Mechatronics 2022
Swinburne University - Hawthorn & Sarawak (Malaysia), GPA: 3.6

- Key areas: microcontrollers, automation, C & C++ programming, image processing.
- Final year project: Developed an image processing system using MATLAB and computer vision algorithms to identify defects in manufactured parts.

Experience

CSV Engineer 2021 – 2024
ICT and Quality & Regulatory Team, 4DMedical Limited (Aus)

- Responsible for Computer System Validation activities, while ensuring compliance with quality standards and regulations.
- Drafted and reviewed risk assessments, validation plans, requirements, test protocols, SOPs and reports.
- Identified, investigated, and reported deviations.
- Planned and managed multiple projects and validation tasks, regularly communicating progress and updates to stakeholders.
- Assisted with the company's initial ISO 27001 certification.

Engineering Intern 2015
Operations team, Moroil Oil Refinery (Mauritius)

- Conducted an energy-use survey across the refinery, collaborating with personnel from multiple departments to understand refinery operations and, collect operational and performance data.

Kitchen Hand 2012 – 2021
Aroma Bakery & Café, and Zimt Patisserie, Bakery & Café

- Worked in a busy environment, multitasking between several kitchen tasks, and providing essential support to the storefront.

Skills

Languages: JavaScript, Typescript (foundational), C#, Python.
Frontend: React, Next.js, Redux, TanStack Query.
Styling: CSS, Tailwind CSS, Sass, Vanilla Extract.
Backend: Node.js, Express.js, Mongoose, Sequelize, Firebase Admin.
Databases: MySQL, SQL, Google Firestore, MongoDB.
Fundamentals: SEO best practices, MVC, CRUD, RESTful APIs, Authentication and Authorisation, WCAG Accessibility standards.
Tools: GitHub, Postman, React Developer Tools, Google Lighthouse.
